CHAPTER 24

The Flying Motor Club

IN THE LAST DAYS OF WORLD WAR II, THE JAPANESE NAVY WORKED TO DEVELOP AN EXPERIMENTAL FIGHTER PLANE TO INTERCEPT AMERICAN B-29 BOMBERS. IT WAS CALLED THE ***SHINDEN.***

BUT ITS FIRST TEST FLIGHT CAME LESS THAN TWO WEEKS BEFORE JAPAN'S SURRENDER-- AND HENCE IT NEVER HAD THE CHANCE TO PROVE ITSELF IN BATTLE.

THE *SHINDEN*, OR "MAGNIFICENT LIGHTNING," FEATURED AN UNUSUAL REAR-WING, PUSHER-PROP CONFIGURATION.

...IT REMINDS ME OF FLYING MY GRANDPA'S PLANE...

TODAY THE ONLY KNOWN REMAINING *SHINDEN* IS HOUSED AT THE NATIONAL AIR & SPACE MUSEUM IN WASHINGTON, D.C.

Welcome back! Once again, we present an economy-size letter that rules "Enchantress" like a tyrant. As with Ms. Swain from Vol. 24, it's nice to hear from a local reader. The "Powell's" to which our latest correspondent refers is a strong supporter of Dark Horse Manga—its main store in downtown Portland is perhaps the largest used bookstore in the world. It's exactly the kind of place you would find Yomiko Readman. But unfortunately, I never have.

Hello!

I've been teaching myself Japanese for a while now. Manga and anime are very much part of that effort, and I love *AMS/OMG!* [*Aa Megamisama/Oh My Goddess!*—the Japanese and English versions of the title—CGH] It's a great story with great visuals. (One image I wish they'd used in the anime was when Belldandy sat on the bottom edge of the mirror as if it was a windowsill.) And, I'm enough of a purist to prefer unflipped manga like your latest volumes and reissues.

Actually, I've had better luck tracking down *AMS/OMG!* in audiovisual formats than in print. I have your reissues of volumes 1 and 2; volume 22 is set aside. Between Powell's and Kinokuniya, I also got the first three tankoubon in Japanese, plus the semi-encyclopedic *AMS Collection*, covering the series through 2004. In contrast, I have the first five DVDs of the TV anime, the complete OAV series, the movie, the movie soundtrack, and the *AMS Singles* CD. (It's not exactly a hardship to hear Kikuko Inoue saying or singing Belldandy's lines.) [Kikuko Inoue also played Yoshiko Ueno, Kubo's girlfriend in *Otaku no Video*. So he ends up not only being dumped, but dumped by Belldandy. For an otaku, that's truly adding insult to injury. A rarely-remarked upon fact is that Ms. Inoue *also* played Super Idol Misty May. Considering the circumstances, you then begin to realize a new, psychologically disturbing level to *ONV*. Who knew there could be yet another level?—CGH]

In his letter in Volume 2, Timotheus was trying to work out a timeline. Let's look at the clues we've been given.

The calendar on Sada's kitchen wall (chapter 2) shows the month of October, and the pattern of days matches 1988. That matches with Belldandy sweeping leaves at the temple (which was more conspicuous in the anime). In chapter 16, Keiichi reminds himself that it was the 25th. So, Belldandy came into Keiichi's life on 25 October 1988. (The moon was full, by the way.) [I note with interest that in the Catholic Mass, the scripture reading for October 25, 1988 was Ephesians 5: 21-23, which has an odd resonance with *Oh My Goddess!*—CGH]

The splash page for chapter 4 shows Belldandy walking in snow, but there's no snow in the actual story until the end of chapter 5, when we see a Christmas tree in Sayoko's apartment. Deciduous trees are still bare in chapter 6. It's not clear if the

greenery in chapter 7 is all evergreen, or if some deciduous trees are coming back.

After Megumi has passed her entrance exam, we learn (chapter 9) that there are just two weeks left before classes start. (Isn't that sorta last minute for entrance exams?) Since the traditional start of the Japanese school year is 1 April, that puts the exam in mid-March. In the anime, she'd already passed the entrance exam when she showed up just before White Day. **[In Japan, Valentine's Day is customarily for girls to give chocolates to boys; the boys reciprcate one month later with white chocolate; hence "White Day"—CGH]** That's 14 March, so the timing matches. Megumi entered the picture (chapter 8) on about 7 March 1989, at which point Belldandy and Keiichi had been living alone together for about four-and-a-half months without even kissing once. **[April 1, 1988 was a Friday; I understand that school in Japan usually begins on the first Monday in April, which would have been the 4th—CGH]**

Timotheus misunderstood the postmark date. In the Japanese calendar, 1989 started out as Showa 64; the sixty-fourth year of the reign of Emperor Hirohito. Then, Hirohito died of cancer only a week into the new year, on 7 January 1989. Suddenly, 1989 became Heisei 1, the first year of the reign of Emperor Akihito. The postmark date is Heisei 1, February 4. I'm guessing that the letter gave the actual dates of Megumi's visit, and Keiichi interpreted it as "this week" while he was reading aloud.

The beach retreat (chapter 13) is apparently during the short summer vacation which interrupts a school year rather than separating them. Urd shows up (chapter 14) soon after. The festival and . . . uh . . . pageant (chapter 15) . . . happen in late summer, which brings it back to their first anniversary, in October '89 (chapter 16).

(By the way, I suggest the word "meniversary" for a monthly milestone.)

One aspect of language and culture that I pay a lot of attention to is names. (What can I say, I'm an SCA herald.) **[When I lived in the Bay Area, I met a mead distiller, Mike Faul, who was doing a good trade with the SCA. I was dubious, because I was never a big fan of honey, but it's really quite a refined drink. Check out www.rabbitsfootmeadery.com. But only if you're Urd's age or older—CGH]**

As can be seen by the sign on Keiichi's bedroom door, the surname Morisato is typical of the peasant-type locatives created in 1870, when the 94% of the populace who'd been forbidden to have surnames were suddenly required to have them. It simply describes where his ancestors were living at the time, or had come from: *mori* "forest" + *sato* "village" = Morisato, "forest village."

(I haven't read anything that explicitly says so, but I can picture swarms of bureaucrats going out across the countryside. It would be at least as challenging a task as the Domesday Book in medieval England.) **[People take having a last name for granted, but it was also uncommon for the average person (i.e., a peasant) in early medieval Europe to have a last name—CGH]**

I was surprised when his personal name didn't show up until Sada spoke it, in chapter 2. As expected, the *ichi* part is "1," as in "firstborn." The *kei* kanji that his parents chose means "firefly." I think that fits in with a lot of other Japanese names that are variations on "bright," including most of the 250+ names that are pronounced "Akira." (The *bert* or *berto* element in some Western names of Germanic origin also means "bright," but the Europeans meant it as a metaphor for "famous"; I suspect the Japanese mean "lively.") **[I just checked the original Japanese again, and yes, it does appear Sada is the first to use "Keiichi." Otaku seem to be very familiar with him—CGH]**

Oh, and K1 isn't a nickname for Keiichi; it's shorthand. It's quick and easy to write, and most Japanese will pronounce it "Keiichi," the same as if it was written in

ideographic kanji or phonetic hiragana. Also, its clear and simple lines are easily distinguishable from a distance, making it a good choice to emblazon on his racing coveralls, as in the movie.

The name Belldandy has such an Anglo-French flavor that I never would have guessed that it's a cognate of the modern German word *werden*. Thanks for reprinting Toren Smith's essay.

The name of the temple they live in is Tariki Hongan. That's a phrase that can be translated as "salvation solely by divine benevolence." **[It should be noted that just like the Christian doctrine of "salvation by grace," there is a vast body of writing in Buddhism about what *tariki-hongan* actually means, and what it implies for the believer. However, in colloquial use in Japan, it definitely has the connotation of being saved by others, rather than by your own efforts—CGH]**

"Megumi" is written in hiragana instead of kanji. That option eliminates the common guessing game of choosing from among multiple pronunciations, but leaves the issue of meaning wide open to speculation. The *Collection* shows it as a single-kanji name that means "blessed" or "blessing" (or maybe "she blesses us").

Sayoko is *sa* "sand" + *yo* "night" + *ko* "child/girl," whatever that combination means. Mishima is *mi* "3" (or "third") + *shima* "island." Aoshima is "blue/green island." Toshiyuki is toshi "narrative" + yuki "origin."

Sada is "help" + "field." Kakuta is "corner field." Ozawa is *o* "big" + *sawa* "swamp."

In the original, Tamiya and Otaki aren't actually named until chapters 12 and 18, respectively. They were usually *sempai* ("upperclassman") or *ano hito* ("that person") or some such. Tamiya is *ta* "field" + *miya* "palace." His personal name is Toraichi; the *tora* is "first horary sign: tiger." It implies that he's not only firstborn, but he was born in a Year of the Tiger, like 1962. Otaki is "big waterfall." His personal name is never given.

I don't know yet if it ever shows up in the manga, but the anime has Tamiya and Otaki calling each other "Den-chan" and "Dai-chan." At first, those cutesy nicknames confused me. Then I realized that "den" is an alternate pronunciation of the "field" kanji, and "dai" is an alternate pronunciation of the "big" kanji. **[As a matter of fact, they *do* use those nicknames in the manga, as early as Vol. 3. In Vol. 14 (called "Queen Sayoko" or the original English version of the *OMG!* manga—they were rendered as "Tammy" (^_^) and "Ottie")—CGH]**

At the very beginning of the original manga, Keiichi is taking a message for "Aoyama-sempai" ("upperclassman Aoyama"), not Tamiya. In the one-frame flashback, Tamiya didn't tell him whom to take messages for, displaying the classic Japanese assumption that context is enough. Aoyama is apparently one of the other sempai in the Motor Club. But, since none of them are actually named any time soon, even Japanese readers may have been confused into thinking that Tamiya's name was Aoyama.

The translator seems to have tried to avoid that confusion by glossing over the mention of Aoyama's name. In the anime, which was also written after that confusion was resolved, Tamiya is identified early on; one of the chores he leaves Keiichi is to wait for a call that Aoyama "blue/green mountain") is expecting. **[The mysterious Aoyama is discussed a bit further in *Oh My Goddess! Colors*—CGH]**

Satoko is *sato* "village/hometown" + *ko* "child/girl." Yamano, in this case, is *ya* "arrow" + *ma* "pause" + *no* "valley"; a valley where you can pause between the arrows of war? From the attitude of Satoko's father, I wonder if it's a samurai name rather than a peasant name.

The most intriguing name is bound up with the setting: Nekomi. The kanji are clearly *neko* "cat" + *mi* "fruit." I can't find any such term as "cat-fruit" in any of my dictionaries or idiom guides. One interpre-

tation might be "kitten," but that's just wild speculation. Scattered throughout the manga and anime, there are feline logos obviously inspired by the name. One of those can be found on a bank in a recurring anime locale, the Nekomidouri Shoutengai, or Nekomi Street Shopping Area.

As to where Nekomi is: according to the address on the letter that Megumi delivers to Keiichi, Nekomi is a city in Chiba Prefecture. (Most of Chiba is a peninsula that encloses the eastern side of Tokyo Bay.) The weather report at the end of chapter 5 refers to snow blanketing Kanto, which is the "Eastern Region" that might also be thought of as Greater Tokyo. That's no help here; all of Chiba is included in Kanto. It's hard to be sure, but Nekomi doesn't seem to be on the shore of either the bay or the ocean. Other clues to narrow down the location will probably show up.

Obviously a college town, Nekomi is a (presumably fictional) outlying "suburb" of Tokyo, something like Forest Grove is to Portland, Oregon. But a "suburb" of one of the two largest cities in the world can be pretty large itself. Nekomi seems closer in size to Portland than Forest Grove.

One last topic is the placement of products and brand names that you've already pointed out some of. There are a lot of them, especially on Megumi's shirts. That's one more difference from the anime, which uses a widespread process I call "product *dis*placement." Familiar brand names and their logos are slightly altered into parodies of themselves. For example, there are Somy TV & VCR, NacDonald's restaurant, a Country 13 realtor, and Dack Daniel's whiskey. The only two product categories that seem immune to the process are weapons and vehicles. (For weapons, look at *City Hunter* or *Gunsmith Cats*.) Keiichi's motorcycle remains a BMW in the anime. Sayoko's Beemer becomes a Mercedes, but it's still a real brand.

Looking forward to the next volume,

Vincent Burch
Portland, OR

P.S. You said that *OMG!* is the second-longest-running manga in the U.S. I'm guessing the longest-running one was created by Rumiko Takahashi.

That's exactly right. The longest-running manga in the U.S. was Rumiko Takahashi's *Ranma 1/2*, published by Viz. It has had a production history very similar to that of *Oh My Goddess!*—it first ran as a Western-style monthly comic book in 1992, and was collected into many graphic novels (in *Ranma's* case, up to Vol. 22) until in 2003 the monthly comic was cancelled and it switched starting with Vol. 23 to Japanese orientation, while at the same time going back and re-releasing the early volumes unflopped. The final volume of *Ranma 1/2* came out just recently; now the honor has passed to *Oh My Goddess!*

Speaking of 1994 (and of Viz), in lieu of our regular notes on old school *OMG!*, we have a special treat . . . with that same classic flavor! Thanks to the kind permission of Viz Media, LLC, we are reprinting the interview with Kosuke Fujishima that appeared in the February 1994 issue of *Animerica* magazine. Beginning in 1993 until the end of its run in 2005, *Animerica*, under the editorship of Trish Ledoux and later Julie Davis, was the first regular monthly professional anime and manga magazine in the United States.

Note that bracketed comments in bold are new for this 2006 re-printing, whereas the regular bracketed comments were from the original 1994 *Animerica* interview.

ANIMERICA: What made you decide to become a manga artist? Did you start as an assistant to anyone?

KOSUKE FUJISHIMA: I started because I love manga—or rather, I liked to draw and create stories. Actually, I think that manga was just the most familiar type of art to me, easily accessible to study and create. That may be closer to the truth. I think I could have gotten into animation just as easily. I was an assistant to Tatsuya Egawa for about a year and a half.

A: What was your debut work?
KF: When Mr. Egawa's *Be Free!* manga was going to be made into a live-action movie, I drew the "making of" movie story, called *Making Be Free!!* That was actually my debut work. But essentially, my first original work was *You're Under Arrest!* (*Taiho Shichauzo*). **[*Be Free!* was my favorite manga in high school. None of Egawa's manga have ever been published in English, but the anime *Golden Boy* is based on his manga of the same name. Note that Dark Horse published two volumes of *You're Under Arrest* in English. A police action-comedy, *YUA!* has a different feel from *OMG!*, but if you're a Fujishima fan you should definitely check it out—CGH]**

A: What's the good part of being a manga artist? And what's the not-so-good part?
KF: I can draw what I want to express and have that seen by many people. I've become what I most wanted to be, and there's nothing happier than that. On the other hand, the tough part about being a pro is that I have to go on doing it whether I feel like it or not. You can't always do what you want to do when you want to do it. Also, this might not be as important as other reasons but . . . well, manga artists don't have to commute to work [laughs].

A: If you hadn't become a manga artist, what do you think you might have become?
KF: I think I still would have become an artist. I don't think I could have gotten away from the fields of design and art. At this point, I can't think of anything else I would have done except become a manga artist.

A: Where did you get the inspiration for *Oh My Goddess!*?
KF: I thought it might be an interesting idea if being a goddess was a job, an occupation. I based it on Norse mythology, which is relatively unknown in Japan.

A: Do you have any spelling preferences for rendering the names of goddesses in English? I understand that in the United States, there's been some confusion . . .
KF: Well, Belldandy is spelled with a "B," even though the proper spelling in the actual Norse mythology is "Verdandi." Then there's Urd and Skuld; the spelling of those two names are unchanged.

A: Where do you stand on the animated version of *Oh! My Goddess*? What do you think of the quality of the OAV series? **[The original five-volume anime version of *OMG!*, currently available from www.animeigo.com. It shares the same director and character designer as the current TV series, but the characters in the OAV naturally appear different from the TV series, reflecting how Fujishima's style has changed over the past decade—CGH]**
KF: Well, it's based on my drawings, of course, so there are always going to be suggestions I could make as the author to improve it, to create new ideas, and to point out exactly where the animation deviates from my original ideas. But animation is the product of the animators, after all, so I just keep quiet so long as their creative intentions are obvious. Even if it's just a *little* different from the manga . . . well, let's just say that if the animation is going to end up being exactly the same as the manga, there's no point in animating it. I think the function of animation is best served when a work with a flavor different from the original comic

emerges, even though both the animation and the comic share the same universe. Quality-wise, I think the level of the *Oh My Goddess!* animation is considerably high. I worked on the storyboards for parts of the opening and parts of the ending of the third OAV volume, so I feel as though the animation is another part of me.

A: It's looking like the English versions of both the animation and the manga are going to be released soon. Do you have any thoughts on your work being seen in the U.S.?
KF: I don't know how well they'll be received, but I hope that the fans will support them. I never intended to create the story for an international audience, so I'm curious to see how people overseas will perceive it.

A: The number of anime and manga overseas is on the rise. Does this come as a surprise to you?
KF: The development of Japanese anime and manga is itself unique, and there are quite a few high-quality works, so I'd like to see them get greater circulation overseas. It would be nice if my works were included among them.

A: When the U.S. company releasing the animation announced their intention to call it "Oh My Goddess!" rather than "Ah! My Goddess," as had been printed in the manga all these years, a great debate started among fans over what the title should be. Which one best reflects your intentions, "Ah!" or "Oh". . . ?
KF: In terms of nuance, I think "Oh" probably comes closer. However it ends up, I think it should be rendered to make better sense in the language of the target country.

A: That's what usually has to happen when titles are brought over to another language. Kishiro's *Gunnm*, for example, became *Battle Angel Alita* in its English version. What about your own works? Do you have a preference one way or the other? How would you feel if the comic and animated versions came out with different titles overseas?
KF: If there's something that fits well in that language, I wouldn't complain. After all, there are movie titles that work much better once they're changed . . . although there are also those that *don't* work [laughs]. I would like to see that the titles of the comics and the animation stay consistent, however.

A: Since we're already on the general topic . . . how do you feel about flopped artwork? It seems as though this has become the standard for publications of manga in America.
KF: It's painful. I'm not that skilled an artist, and so when the artwork is flipped, all the shortcomings in my drawings become obvious. There's also an artistic consideration. Some panels lose the balance of their composition when they're flopped. If it were possible, I would prefer for everyone to be able to see the original version, the way I intended my artwork to be seen in the first place.

A: Is there anything in particular about the American fans of both your animated and manga work that you would like to know?
KF: Actually, I'd like to know what aspects of my work American fans are attracted to. I'm sure they must have a different perspective than Japanese fans. Cultural differences, most likely.

A: Let's talk a little about the *Oh My Goddess!* series. Which goddess is your favorite? Are there any aspects of their character, style, or fashion that you are particularly fond of?
KF: I don't really have a favorite, but . . . well, Urd is always outspoken and has more mature sensibilities, so I like her.

A: Speaking of fashion, your characters are always so beautifully dressed. Where do you get the ideas for the fashions in your comics?

KF: I study fashion quite a lot. Often, I find surprises in children's clothes. I'm always ready for a chance to study children and women's clothes at department stores.

A: As a manga artist, what are your work habits like? Do you work every day of the month? Are you a morning person? A night person . . .?
KF: I work almost every day, and I'm usually a night person. I don't pull that many all-nighters, however. I find that my drawing skills start going down the drain if I pull too many of those [laughs]. I try to leave a little free time in my schedule when I can help it.

A: How many assistants do you have?
KF: Six.

A: Do you ever have times when being a professional manga artist seems more trouble than it's worth, times when you feel discouraged?
KF: When I can't think up a story. When I can't draw the way I want to.

A: And what do you do to comfort yourself?
KF: I talk on the phone with friends. Talking to someone in the same business is best. When I see others going through the same thing, I'm comforted that I'm not alone, and I find courage in that.

A: Do you have any advice for fans who want to draw their own manga?
KF: Everyone's goals are different, so I can't make a blanket comment, but an artist basically draws manga to communicate an idea to others. The idea won't be communicated if the work is understandable only to its creator. It just won't work. I think the meaning of manga is to have it understood by as many people as possible.

A: It won't surprise you to hear that there are several publications devoted to comics journalism in America. Do you have your own "theory of manga"?
KF: As far as a theory goes, I guess I've already said it. To be successful, manga needs to be understood by as many people as possible. I have a certain interest in the nature of comics journalism, but I don't have a particular theory other than what I've already expressed.

A: In Japan, manga with highly violent and sexual content is often the target of criticism. Your manga doesn't come under this sort of scrutiny, however, perhaps because the stories are more "pure" and tend to revolve around adolescents What are your thoughts on sex and violence in manga? **[Although hardly extreme material, *You're Under Arrest* was definitely more fan-service oriented than *Oh My Goddess!*. Since *YUA!* was a seven-volume series, and at the time of the interview *OMG!* was only up to Vol. 9, it would have been perhaps more fair to say that Fujishima had moved in the direction of "pure" stories, rather than to suggest they were entirely representative of him—CGH]**
KF: One way of looking at it is that I haven't drawn any explicit sex and violence because it hasn't been necessary. It happens often enough in real life and besides, sex isn't something evil. I think pretending sex and violence doesn't exist only breeds ignorance. There are stories that actually require a certain amount of it to be successfully told. Of course, this is all assuming that the sex and violence isn't done gratuitously.

A: Is there something you keep in mind when you draw manga?
KF: I try to express at least one definite idea clearly. That's my goal.

A: What about the future? What kind of stories would you like to draw?
KF: Right now, for the indefinite future, I'm tied up with *Oh My Goddess!* After that,

who knows? I may end up continuing to draw adolescent stories. I'm also interested in stories which explore "male-bonding" friendships and situations.

A: Of all your other works, are there any in particular that you'd like your American fans to read?
KF: I only have two other works. *You're Under Arrest!* and *Striker*, so I guess the choice isn't too difficult. And even though I drew it from a different perspective, *Striker* was created with American comics in mind. Naturally, I'm interested in an American reaction. **[Since 1997, Fujishima has also become known for his character designs in the *Sakura Taisen* series. *Striker*, which apparently has never been collected in Japan, is understood to be a gonzo baseball story that ran occasionally in the weekly Kodansha magazine *Morning*—CGH]**

A: Let's talk about your hobbies. What sort of things do you enjoy doing? Do you have any favorite music, or favorite films?
KF: My favorite things are motorcycles, automobiles, airplanes, the sea. Reading. Plastic models. My favorite activities are sleeping, riding motorcycles, drawing pictures, and talking on the phone. My favorite music . . . well, I listen to everything. My favorite movies are *Streets of Fire*, *Blues Brothers*, *Das Boot*, *The Hidden*, and *Terminator 2*. I've also been getting into *Memphis Belle* a lot recently. I bought a sidecar recently—a German sidecar by the name Krauser Domani—and I'm pretty infatuated with that at the moment.

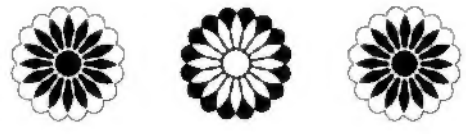
A: Are there any foreign countries you'd like to visit?
KF: Australia. America. Germany. But I'm most comfortable with Japan. I would like to see drag racing and air racing in America someday. The only problem is that I can't speak English [laughs].

A: Are you interested in mecha and robots? They don't appear much in your work, but . . .
KF: Sure, I like them very much. Real-life robots are doing wonderful things, and it's fun watching them do their work.

A: Any future plans relating to your leisure time?
KF: I'd like to become a pilot and fly by myself, but that's just not possible with the time I have. The sky is right there, but it's so far away. So I just lie down and watch the sky.

A: As we discussed a little earlier, anime and manga are becoming very popular overseas. There are even anime and manga conventions. Would you be interested in attending one day . . . ?
KF: Hmm, I wonder what sort of things they do there? I only hear rumors . . .

A: In closing, do you have a message for your English-speaking fans?
KF: If there's anyone out there who reads my manga and is inspired to become a comics artist because of it, then I would really be pleased. I wonder if there is anyone . . . ? [laughs]. One of my dreams is to become a world-class manga artist someday. If by some chance I ever achieve that, I would like my fans to be proud and say "I knew him when." You can count on me to try my best for both our sakes.



Special thanks to Syrian otaku Wa-L Masri, who explains that the Arabic on the cover of the Demons CD (p.60) is a conjugation of the verb "to do." The Arabic on the Gods CD (p.77) is just random letters, and the "Arabic" on the inside of the case (p.101) is just squiggles ^_^.

Creator Kosuke Fujishima in 1991!

His message to fans in the original Japanese *Oh My Goddess!* Vol. 4:

"Thank you so much for all your support! It's already been two years into the manga, and here I am at the fourth volume. Since I began I've moved from Higashi-Nakano to Kawasaki. I've exchanged my Suzuki GSX-R for a Harley. But one thing that hasn't changed is that I still don't get any bodily exercise. My only physical recreation is to walk around my apartment. With one of those step counters."

STOP! This is the back of the book!

This manga collection is translated into English, but arranged in right-to-left reading format to maintain the artwork's visual orientation as originally drawn and published in Japan. If you've never read comics this way before, take a look at the diagram below to give yourself an idea of how to go about it. Basically, you'll be starting in the upper right-hand corner, and will read each word balloon and panel moving right-to-left. It may take a little getting used to, but you should get the hang of it very quickly. Have fun! If this is the millionth manga you've read this way, never mind. ^_^
